

**An evaluation pilot study of a teachers drug prevention training.  
(W. Kozłowski)**

**Summary**

The evaluation of a training programme for teachers and school psychologists in drug prevention is presented. The programme has been elaborated in Prevention and Therapy Center "OPTA" in Warsaw. The course is intensive (150 hours) and includes the interpersonal training, workshops of educational skills, information about alcohol related problems, planning of prevention activities and supervision.

18 programme participants were tested. Scheme pre- and post-test without a comparison group was used. The results indicate a significant improvement of participants educational skills.
